FEATURED STORY:

Jim is from Wichita and he's uninsured right now. Jim is a farmer and spends most of his time working for local farms. Right now he's dealing with diabetes and an injured foot, but he hasn't been able to get it addressed. Having health care would put Jim at ease. He wants others to know that there are Kansans who want to take care of themselves and keep going, but when they can't get medical treatment to help them do that, they start to struggle.
